

Organisations are continually seeking how to deliver projects more efficiently

but

most are struggling to realise the transformational value that AI and Machine Learning can deliver

90% of executives say digital "plays a central role in their overarching business goals"

Forbes 2018 <https://bit.ly/2RDpuXF>

Despite ranking 11 out of 13 industries – construction companies are increasingly adopting AI technology. "A shift is coming,"

McKinsey 2018 <https://ubm.io/2G0rT8r>

Oil and gas projects have an average cost growth of 35% and 10 month delay

Oil & Gas Authority 2017 <https://bit.ly/2RSRjdW>

98% of megaprojects incur cost overruns or delays, with average cost increases of 80% and slippages of 20 months.

McKinsey 2015. <https://mck.co/2AQYOWF>

Transforming project delivery within your organization – using AI and Machine Learning to reduce risk, prevent schedule overruns, and improve cost-effectiveness

CONSULTANCY

Igniting the Professional Imagination

An incremental approach centred around your existing capabilities to characterise, model, visualise and extract insights from your data

From data visualisations to high end machine learning and AI. We are plugged into the very latest in the industry and are expert at tailoring solutions to reflect the specific needs of your business.

Disruptive Solutions

Our solutions range from predicting the winner of a bid through to data ecosystems. We help you to challenge the status quo transforming your business.

Martin's approach... is both revolutionary and highly disruptive. The world...needs more people like Martin to shake things up and make us think differently

CAPABILITY

Developing in depth Capabilities

We deliver masterclasses, C-Suite training, foundation courses through to expert practitioners.

Our team comprises PhDs, MScs and a Fellow of the APM. We are experts in our field, spanning data science, data engineering and project delivery. We also have global thought leaders and influencers who work as an integrated but extended part of our team.

Developing your Pipeline of expertise

We are developing a project data analytics apprenticeship. Hands on training, real data, delivered by expert practitioners.

70% of CEOs want to transform. They need people who can understand the technology, the IT, AI machine learning and data analytics and how it can be applied to improving productivity/construction¹

COMMUNITY

Building the Community

We founded and run the London Project Data Analytics Meetup in Dec 2017; a community of >2000 members

- Events
- Masterclasses
- Conferences
- Recruitment

"Worldwide revenues for big data and business analytics is expected to grow to >\$187 bn by 2019 and the project management industry to hit \$5.81 trillion by 2020"²

² CIO.COM <https://bit.ly/2RleFDX>

Developing the Community

We run Project:Hack, a community based Hackathon held at the Microsoft Reactor.

We bring together a community of up to 120 people to cross fertilise expertise, challenge the status quo, spark innovation and upskill. Such an approach has had an infectious impact on how our sponsors approach and leverage data.

How will your organisation position itself for a data enabled future?
Contact us to explore how we can unlock the potential in your data and untapped project delivery experience.

How Can We Help?
