

Challenge: Data Strategy

Working with your use cases, Projecting Success challenge the status quo, define enhancements and identify opportunities for growth.

Projecting Success provide thought leadership on how to leverage value from project data. Our quest is to move the dial on how projects are delivered, plugging into the very latest global developments. We help organisations to navigate the challenges that such an approach presents.

We see a lot of organisations venturing into the world of project data analytics without having a clear view on why, how and what the end result will be. Implementing data enabled project delivery is not a linear process where all the outcomes can be predetermined from the outset. It requires a more agile approach that enables the organisation to respond to obstacles (data availability, quality, consistency etc) and opportunities (advancements in project data analytics, collaborations etc). Strategy is a key component of this journey.

Business Alignment

Supporting business objectives and outcomes

Project Delivery Transformation

How to move the dial on how projects are delivered

Digital alignment

Facilitating delivery of the broader digital strategy

Enablers

Architecture, policies, governance, capability, capacity

Data Culture

Transitioning towards data enabled project delivery

Key barriers for organisations seeking to implement project data analytics

1. Lack of strategy
2. Too many priorities
3. Lack of management understanding.

Projecting Success work with organisations to help them through this journey, leveraging our deep experience in strategy development and advanced project data analytics. We separate the hype from the realities of project delivery and legacy constraints within your organisation. Linking the data strategy to key business and project priorities, we create a data enabled culture that transforms how projects are delivered.

“

Projecting Success have challenged our thinking on how we extract value from data. I continue to be enlightened on what can be achieved, sometimes only in a matter of days when historically it may have taken us years to achieve a lesser result. We regard the team as magicians of their craft, pushing the boundaries of the art of the possible and we look forward to working closely with them in the future. They have a bold and inspirational vision that has the potential to change the future of construction.
